

SETTING UP YOUR EMAIL FACILITY

GHOSTMI.com gives you the ability to add your email settings information this allows the system to send emails to your clerks/clients etc directly from the system.

To do this GhostMI.com requires some basic information in order to access your email sending facility.

The system requires the following information

HOST -
PORT -
USERNAME -
PASSWORD -
ENCRYPTION METHOD -

The settings you require for this feature may be found in our list below if not search the internet for your settings - for example

"What are my outgoing SMTP settings for @hotmail.co.uk"

If you are still struggling email - hello@ghostsoftware.co.uk

* Apple uses 2 step identification for Email access and this is not supported by non Apple websites like GhostMI.

As such in order to create SMTP outgoing mail facilities on GhostMI please follow these steps.

Log in to your Apple Account - <https://appleid.apple.com/>

Log in to your account and click on "Generate Password" under the "APP-SPECIFIC PASSWORDS" section.
Name your password as GHOSTMI
This will create a 19 digit unique password for GhostMI.com.
Then follow the standard process using your new password.
